Experiment 2: Sketch a Simple Prototype of a Bus Ticket Booking System Using Figma

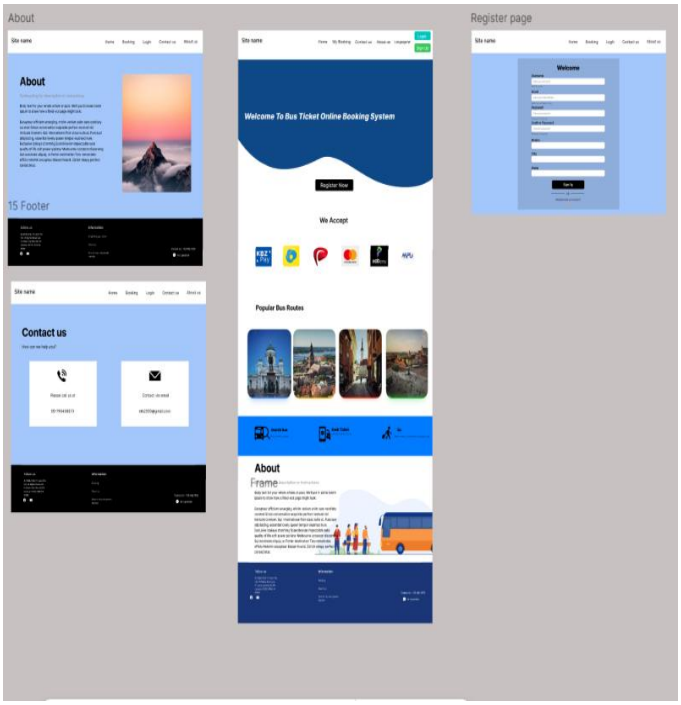

Aim

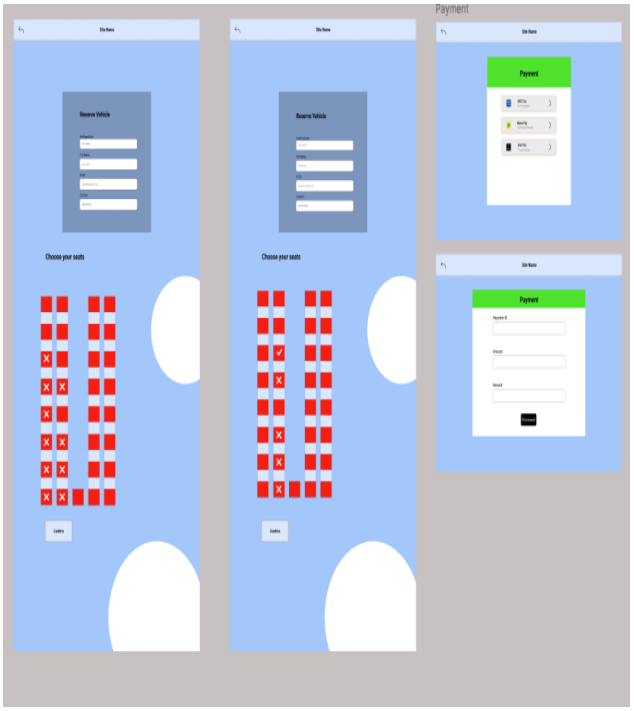

To design a simple prototype of a Bus Ticket Booking System using Figma, allowing users to search for buses, select seats, and confirm their bookings.

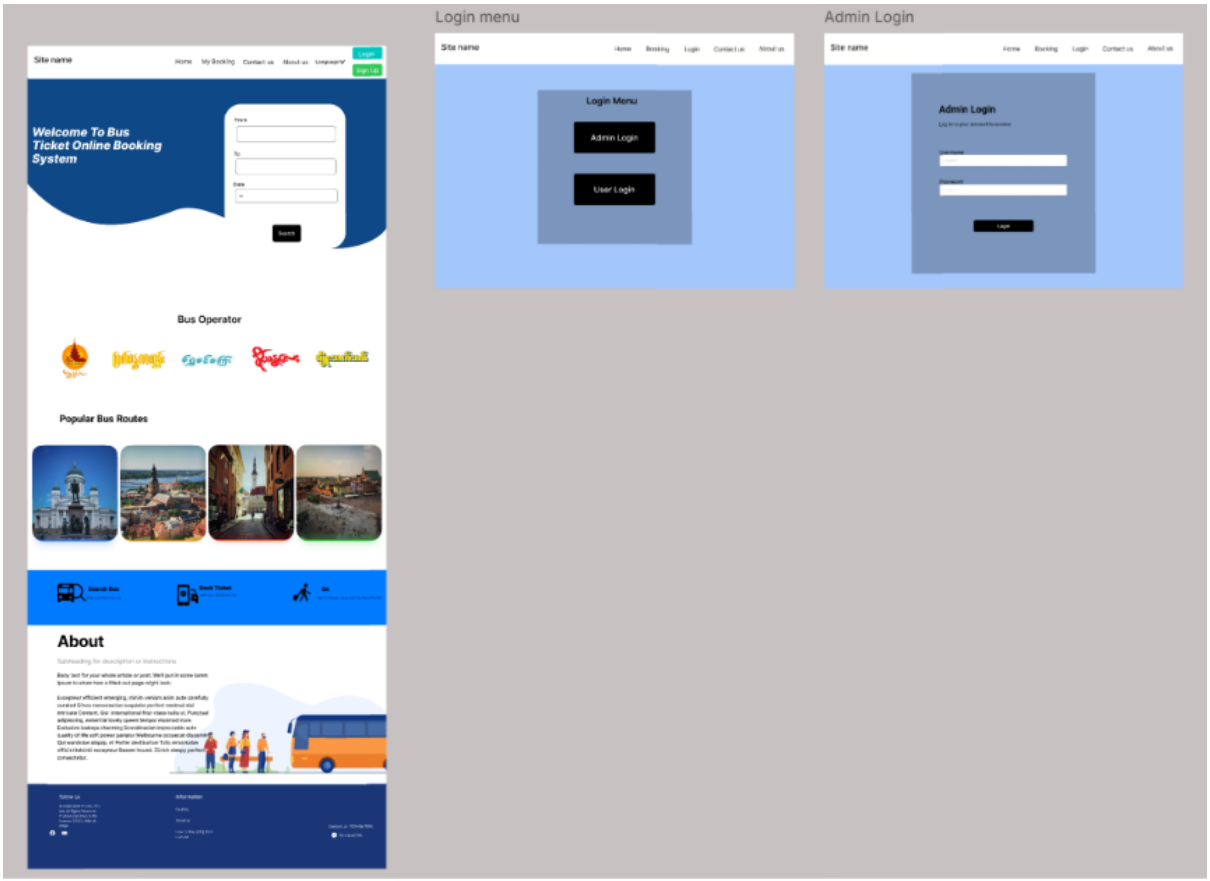

Procedure

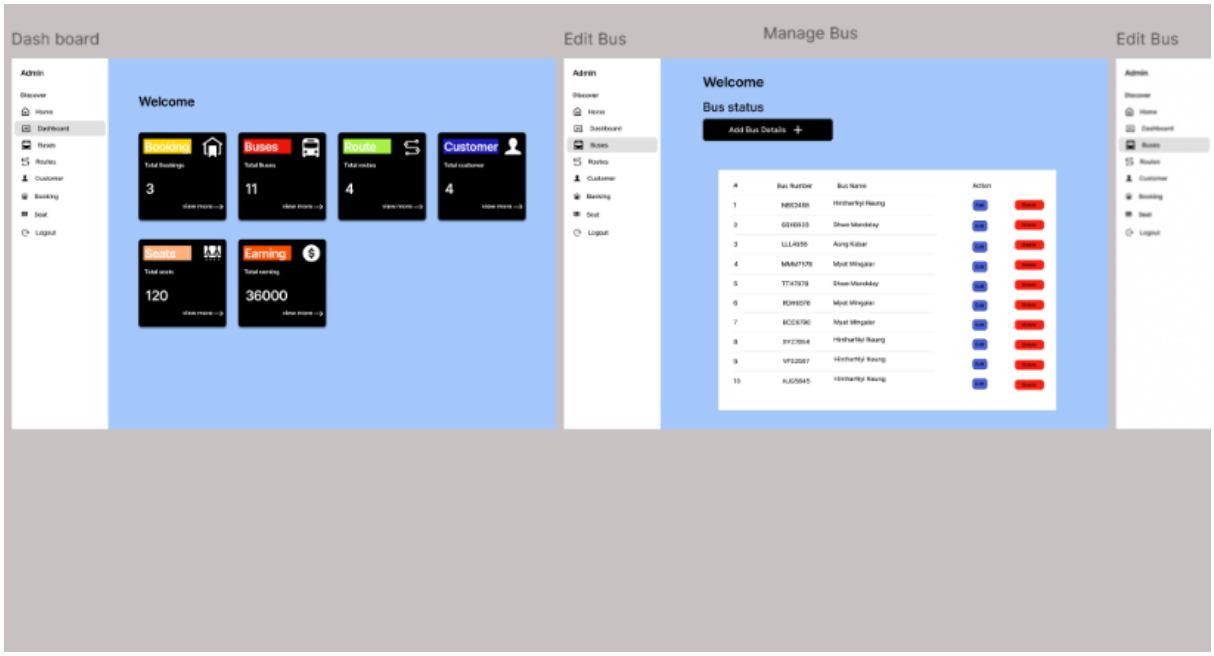

1. Open the Figma website and log in to your account.
2. Create a new design file.
3. Use the Frame tool (F) to create a mobile screen.
4. Design the Home Screen with source, destination, journey date, and a Search Buses button.
5. Create a Bus Search Results screen displaying bus names, departure times, and ticket prices.
6. Design a Seat Selection screen with available, booked, and selected seats.
7. Create a Booking Confirmation screen showing the booking ID, journey details, seat number, and fare.
8. Use the Text and Rectangle tools to add labels, buttons, and input fields.
9. Open the Prototype tab and connect the screens using interactive buttons.
10. Click Present to test the prototype and verify the navigation between screens.

Result

A simple Bus Ticket Booking System prototype was designed successfully using Figma. The prototype demonstrates bus searching, seat selection, and booking confirmation through interactive screens.
